Arnav Gokhale

Builds production data integrations — pipelines, embedded BI, and AI tooling — used daily by C-level executives
Comfortable from PostgreSQL schema design to React front-ends to CI/CD

EDUCATION

Texas A&M University, College Station, Texas

Master of Science in Economics

Dec 2026

Bachelor of Science in Electrical Engineering | Minor in Economics

May 2025

EXPERIENCE

Southern Careers Institute

Austin, TX

Data Engineer Intern

May 2026 – Present

- Engineered a CRM data pipeline — Azure Blob Storage → PostgreSQL → Apache Superset — processing 6,700+ leads and 50,000+ events with exact-match validation across 8 campuses.
- Replaced 3-day manual Excel workflows with a production React 19 + TypeScript revenue-ops dashboard (SCI Flight Deck); iterated directly with CEO, CFO, and COO across 10+ campus locations.
- Deployed 8+ embedded Superset BI dashboards (conversion funnel, rep performance, campus enrollment) with multi-tenant row-level security and guest-token access control per campus.
- Cut dashboard load times 9–12x via PostgreSQL materialized views (1,405 ms → 157 ms) and BI query caching (5,498 ms → 607 ms).
- Merged 120+ pull requests at 100% CI pass rate (482 unit tests, 222 Playwright E2E); triaged and resolved 28 of 33 security findings including credential exposure and auth fail-open bugs.
- Shipped an AI assistant (Claude API, streaming, 3 model tiers) surfacing proactive enrollment and rep-performance insights within the dashboard.

TECHNICAL SKILLS

Languages: Python; SQL; TypeScript; JavaScript; R; MATLAB; C++

Frameworks & Libraries: React; Node.js; Express; Vite; Zustand; Playwright; Vitest; Zod; pandas

Data & Analytics: Apache Superset; PostgreSQL; Azure Blob Storage; Tableau; Microsoft Excel; Apps Script

Tools: Git; GitHub Actions; CI/CD; Anthropic Claude API

PROJECTS

Supply Chain Stress Dashboard

2025 – Present

Developer

- Built a FastAPI + SQLAlchemy backend ingesting 7 macroeconomic indicators (FRED, NY Fed GSCPI, Cass Freight Index, Baltic Dry, yfinance) into a dynamic composite stress index.
- Applied Z-score normalization with a 36-month rolling window and regime classification (low / normal / elevated / crisis) to drive a Streamlit market-impact dashboard showing sector ETF and stock returns by supply chain regime.

FoodFinder — Restaurant Discovery PWA

2025 – Present

Developer

- Built a full-stack React + TypeScript + Express PWA querying OpenStreetMap (Overpass API) for currently-open restaurants; integrated OSRM batch routing for real-time drive/walk times on every pin.
- Shipped with 11 filters, happy-hour detection from OSM tags, viewport-driven search, GPS re-centering, and offline installability — deployed on Vercel with a separate Express backend on Render.

CERTIFICATIONS

Google Data Analytics Professional Certificate

Aug 2025

Data cleaning, visualization, SQL, R, and Tableau — end-to-end case studies on real-world analytics problems.

LEADERSHIP

Phi Delta Theta

Fall 2021 – Fall 2024

Academic Chair

- Organized weekly study sessions for ~70 members across engineering and economics courses.

- Raised chapter GPA by 0.75 points through structured schedules, exam calendars, and peer tutoring.
